

# ANIMAL SOCIETIES

We explore the Animal Kingdom and look closely at how animal tribes/families live together to create communities. The organized, social and family dynamics are featured, including the role of mum and dad, the competition and bonding between the offspring, leaders and workers, who's the boss and how do they mark their territories?

We see common themes in how animal families protect each other and then go off to fend for themselves across a range of species.

Each episode is a template of 3 different animal family features with themed content around the stories of how animal packs structure their families, teach and care for their young and launch them into their own destinies.
