

# RE-THINK!

This factual entertainment series explores the way we see and interpret the world around us with engaging tests, activities, demonstrations and explanations.

In each episode, we experience visual and audio illusions, sensory puzzles and brain tricks from the worlds of art, science, nature and psychology and learn why they baffle our senses.

Each 30-minute broadcast episode contains 7x3-minute segments covering topics such as how our brain interprets what we see, the psychology of patterns, thinking, colours, design, art, illusions and how our senses work.
